

The Cascade

- Northwest craftsman style cottages style cottages with covered front porches and other architectural features.
- Sustainable energy (Net-zero energy ready, carbon-neutral, energy-efficient).
- Low Impact Development.
- Neighborhood design that includes low maintenance, smaller lots.
- Nested Home design to preserve privacy and native vegetation 20+ acres of common space including trails, wetlands and open space.
- High-end building components.

In the 1950's the average household included 4 people living in about 1000 sq. ft. Today, the average house is 2600 sq. ft with 2 people and creates over 8000 pounds of waste to build!

The Preserve is a local, craft development specializing in the construction of smaller, sustainably built cottage homes. Our goal is to provide affordable housing for working families while preserving environmentally sensitive areas.

The Cascade is a 950 sq. ft. house built with only 2% waste We've design The Cascade to be beautifully crafted and energy efficient
